

VULKASCHOL 951

Black

DESCRIPTION

Vulkaschol 951 is the universal rubber solution for hot vulcanization of steel cord and fabric conveyor belts in normal rubber quality NQ and Y.

APPLICATION

- Surface preparation
The surfaces must be clean, dry, free of grease and oils.
Splice must be prepared according to Lutze splicing instructions. The fabric plies must not be scratched, cut, grinded or roughened!
- Applying
Stir Vulkaschol 951 thoroughly before using. Apply the solution evenly and allow to dry completely.
Then join the surfaces together and press on the entire area.
- Vulcanization
The vulcanizing properties depend on the type of conveyor belt. The necessary information on temperature, pressure and time can be found in the Lutze splicing instructions.

PROPERTIES

	Value	Unit
Consumption	ca. 150 – 200	g/m ²
Minimum shelf life	9	Months
Storage conditions	Dry, cool, frost-free, container tightly closed.	

The values determined in the laboratory can be used as an orientation and may deviate in practice.

AVAILABLE CONTAINER SIZES

Amount	Container	Art. No.
650 g	Can	2322340
20 Kg	Barrel	CA1343
